# RHINO-RACK

RCP58-BK Generic Swivel Pad Kit

Important:	Please read these instructions carefully prior to installation. Please refer to your fitting instruction to ensure that the roof racks are installed in the correct locations. Check the contents of kit before commencing fitment and report any discrepancies

Note: Crossbars and legs sold as separate. Suitable for both RVL , RVH, RCL and RCH legs and bars.

Important Information.

Maximum roof load: 75kg/165lbs evenly distributed across two crossbars. Refer to vehicle owners manual for maximum roof loading. Always use lower of the two figures. Note: Be sure to check the Rhino-Rack website to see if you have the latest version of instructions before beginning installation.

Recommendations:
It is essential that all bolt connections be checked after driving a short distance when you first install your crossbars. Bolt connections should be checked again at regular intervals (probably once a week is enough, depending on road conditions, usage, loads and distances travelled). You should also check the crossbars each time they are refitted. Make sure to fasten your load securely. Please ensure that all loads are evenly distributed and that the centre of gravity is kept as low as possible. Use non stretch ropes.

Please remove crossbars when putting vehicle through an automatic car wash.

Load Ratings:
Maximum permissible load is 75kg (165lbs) for two crossbars including the weight of the crossbars, 5kg (11lbs). When crossbars are to be used in off-road conditions, please build a safety factor of 1.5 into this load limit for off-road use, two crossbars = **50kg 110lbs)**. Although the crossbars are tested and approved to AS1235-2000, Off road conditions can be much more rigorous. However, increasing the number of crossbars does not increase the vehicles maximum permissible roof loading.

Note for Dealers and Fitters:
It is your responsibility to ensure instructions are given to the end user or client.

Fit Time: 15min
Issue No: 01
Issue Date: 22/06/2017

These instructions remain the property of Rhino-Rack Australia Pty. Ltd. and may not be used or changed for any other purpose than intended.
Ensure Ladder is well supported on the ground to help support tent. Take extreme caution when climbing heights above 1.2m/4ft.

It is required for Clam Shell Roof Top Tents to use a 3 Crossbar System.

When these roof racks are to be used on a vehicle that is driven off sealed roads, the manufacturer maximum roof load rating (to be found in the vehicles User Manual) should be *divided by a factor of 1.5*. Do not forget to subtract 5kg from your maximum carrying capacity due to the weight of the crossbars and legs.

75kg/165lbs load rating (Urban road) = **50kg/110lbs load rating** (off road)

WARNING! Important Load Carrying Instructions

With utility vehicles, the cabin and the canopy move independently. Roofracks and vehicle can be damaged if the item transported is rigidly fixed at points on both the cabin and canopy. Instead, rigidly fix to either the cabin roofracks or the canopy roofracks.
